

Clinical Edit Criteria Proposal

Drug/Drug Class: **Miralax Clinical Edit - Change**
Date: **March 31, 2005**
Prepared for:
Prepared by: **Missouri Medicaid**

☐ New Criteria

☒ Revision of Existing Criteria

Executive Summary

Purpose: Monitor the use of Miralax Powder for Oral Solution as first line treatment of constipation.

Why was this Issue Selected: Miralax prescription claims are significantly more expensive to the pharmacy program than other drugs prescribed for constipation. The average Miralax prescription costs the program \$35.42. The average prescription claim for non-prescription laxatives costs the program \$9.16.

	Drug	Claims	Expense
Program-specific information:	• Miralax Powder	35,126	\$1,244,181
	• Docusate 100mg Caps	16,534	\$144,948
	• Dulcolax 5mg Tabs	2,731	\$23,080
	• Senokot-S Tabs	3,212	\$37,975

Setting & Population: Patients 13 years of age and older

Type of Criteria: ☐ Increased risk of ADE ☒ Non-Preferred Agent
☒ Effectiveness ☐ Other:

Data Sources: ☐ Only administrative databases ☒ Databases + Prescriber-supplied

Setting & Population

- Drug/drug class for review: Miralax
- Age range: All patients 13 years of age and older
- Gender: males and females
